READY MIXER

COMPANY PROFILE

Ready Mixer is a manufacturer of short-load concrete mixing batch plant equipment, including 1-3 yard mixers on trailers, and 3-5 yard mixers on skid rails, hoppers, and wheel loaders, concrete pump trailers, and concrete power trowels.

Founded in 2023, Ready Mixer is a short-loaded concrete manufacturing enterprise dedicated to the R&D, sales, and service of intelligent short-load concrete operations and other concrete equipment applications. The company has developed more than 7 models of equipment that are widely applied in the concrete industry for short-load concrete solutions and other concrete applications.

Fundamentally our company was built to save money on short load fees, minimum order quantities, and kill wait time for concrete with our short load batch system. We have then expanded our product range of concrete equipment to solve other various problems within the industry.
